

Project Name : PORTFOLIO WEBSITE PROJECT FOR INTERVIEW

This project is a basic website design that serves as a foundation for future development. The current version focuses on completing a simple and clean design, with some essential features in place. More advanced functionalities and improvements will be implemented in the future.

Current Version

This is the initial or foundation version of the project. At this stage, the website includes a simple design, and the primary goal was to lay down the structural groundwork for future enhancements.

What's Included:

- A simple website design.
- Basic layout structure.
- Some initial styling and design elements.

What's Still to Come:

- **Responsive Design:** More work is planned to make the website fully responsive across various screen sizes and devices.
- **Bootstrap Integration:** Future versions will incorporate Bootstrap to streamline design and ensure consistency.
- **JavaScript Implementation:** Interactivity and dynamic content will be added using JavaScript.
- **Task Automation (Gulp):** Gulp will be used for automating tasks like file minification, image optimization, and other build processes.
- **SEO Optimization:** The website will be enhanced to be more SEO-friendly in the future.
- **Cross-Browser Compatibility:** Testing and adjustments will be made to ensure the website works smoothly across different browsers.

Installation

Clone the repository:

```
git clone <repository_url>
```

- 1.

Open the project folder:

```
cd <project_folder>
```

- 2.
3. Open the `index.html` file in your browser to view the website.

Future Work

As mentioned, this is just the foundation. Here's a brief overview of the key upcoming improvements:

- **Mobile-first responsiveness:** Ensuring that the website adapts seamlessly to all screen sizes.
- **Additional functionality:** Integrating advanced features like forms, interactivity, and content management.
- **Task Automation:** Automating repetitive tasks using Gulp for efficiency.
- **SEO & Browser Compatibility:** Making the website SEO-friendly and fully compatible with all major browsers.

Contributing

If you'd like to contribute to this project, feel free to fork the repository and submit pull requests. Suggestions and improvements are always welcome!
